# ContactApp

1. Create a Contact App with following entities as per the UML given in the example:
   a. User , Contacts and Contact Details
2. User will have two roles: Admin or Staff
3. Following are the features for Admin:
   a. CRUD on users
4. Following are the features for Staff:
   a. CRUD on his/her Contact and Contact Details
5. UML

Constraints:
1. If an entity is deleted, the app sets the isActive flag to false
2. If isActive flag of user is false; he/she cannot perform CRUD on any entities
